SOURCE                      25X1X

1. Between 1 p.m. and 4 p.m. on 20 May 1953, source observed 32 MIG-15s, 16 Pe-2s and 2 biplanes at Deutsch Wagram (P 49/S 50) airfield. There was no air activity. The AA gun emplacements were not occupied. A van-like truck with an antenna shaped like a "X", previously observed near the emplacements, was removed.

                     wearing black-bordered blue epaulets, were observed entering and leaving the field.                     

2. Two piles of small crates and 12 larger gray colored crates with iron corners were stored in front of the aircraft repair shop.                      drivers wearing black-bordered blue epaulets were parked in front of the workshops.

3. The radio installations at Parbasdorf (P 49/S 50) consisting of two van-like trucks, including one with a seven-sectional directional aerial, were observed at their previous locations. The telephone line to the quarters in the village still existed. The following radio installations were observed in the vicinity of the field:
- Antenna mast with cone-shaped bracing, about 500 meters southwest of Feldhof (P 49/S 60) which is west of Obersiebenbrunn.
  - PKV-45 DF station, about 800 meters west of Feldhof.
  - Antenna mast with cone-shaped bracing, about 3,000 meters west-northwest of Feldhof.
  - Row of six searchlights adjacent west-northwest of the aforementioned antenna mast.
  - CCR-602-type radar station, about 300 meters east-northeast of the road overpass at Deutsch Wagram railroad station, just north of the railroad embankment.
  - Antenna mast and van-like truck with rod antenna, about 200 meters east of the church at the southwestern exit of Deutsch Wagram.

1.                      Comment. Deutsch Wagram airfield is occupied by a Soviet fighter regiment. It is believed that a bomber regiment is also stationed at the field since Pe-2 planes have been observed there since 14 March 1953.

2.                      Comment. The radar set and navigation installations were unchanged.
